“a diligent workforce performing coherently day and night to meet customer demand”

ABOUT US

“IRIS observes worker safety as its number one priority”

THE JOURNEY:

SINCE 1997

IRIS started its journey in the year 1997. The first ever operation was through Mark Style, a buying consultant, that primarily dealt with customers from the European Subcontinent. Through resilience and hardship, business grew and Mark Style entered manufacturing in 2003 as IRIS Group. Today, IRIS has become one of the best knit-based textile manufacturing powerhouses in Bangladesh - a fully vertical setup that expands to knitting, dyeing, washing, sewing, jacquard, embroidery, printing, and state-of-the-art lab facilities recognized by renowned brands, the likes of H&M, Next, Lindex, and Kmart.

With headquarter located in Dhaka, and three manufacturing units within close proximity, IRIS is able to maintain a volatile supply-chain that can tackle shortest of lead times. This is achieved through nurturing a diligent workforce performing coherently day and night to meet customer demand. Amidst growing challenge, IRIS focuses heavily on continuous improvement. As a result, IRIS is regularly looking into latest technologies and relevant autonomous systems to maintain sustainably towards its endless growth.

MISSION: SAFETY AND SUSTAINABILITY

Most importantly, IRIS observes worker safety as its number one priority. To resonate safety practice, IRIS has ensured ergonomic workplace adhering to best practice compliance standard and its facilities built parallel to international guidelines.

ENVIRONMENTAL ACTIVITY

WATER SAVINGS

Installed water tracking flow meter across all dyeing machines for better control and savings

Using trigger nozzle for better water efficiency and reduce misuse

SOLAR PANEL

145 KWP

connected with national grid

ENERGY SAVINGS

Inverter at compressor and boiler

Servo motor installed, replacing clutch

WASTER WATER MANAGEMENT

ETP

4400 cubic meter per day biological ETP

Exceeds factory requirement - 2800 cubic meter per day

ETP LAB

Etp lab with pH, DO, BOD, COD, TSS, and TDS test facility

WATER REUSE

ETP WASTE WATER

Reuse for chemical drum washing, drain and road cleaning purpose

RAIN WATER HARVEST

100 % rooftop area rain water harvesting

Rain water in various prepose like foot wash, gardening, car wash, fire water reservoir

FACILITY LAB

Starting 2017, IRIS revamped its laboratory facilities. The lab is now equipped with state-of-the-art apparatus. Thus allowing to obtain precision results along with quick turn-around time for any physical test needs.

24/7 Conditioning Room

Since its inception, the temperature and humidity control room has been running and delivering accurate data to help achieve the perfect finished fabric. Its variant setting options allow for various setup conditions replicating any global habitable environment.

Type of test

Colour Fastness to wash | Perspiration | Phenolic Yellowing | Rubbing | Oil Rubbing | Saliva | Water | Twisting(Spirality) | Household laundering | Bursting Strength | pH | Nickel | Pilling Resistance | Stretch and Recovery

Brands

Emerson, James Heal, Lab Tech, Memmert, Orbital, Metrohm 780, Roaches, Wascator, Electrolux, Whirlpool, Siemens, Mesdan-Lab, Sigma, Safeguard, Verivide, Emerson, Ja-series

DEPARTMENT LOGISTICS

Fully independent logistic support

total number of vehicle | 52 units

GPS Tracking

all type of company vehicles are monitored with Geographical Positioning Systems (GPS) thus allowing accurate dispatch/ receive of goods
